

# NATIONAL IRRIGATION AND POWER PROGRAM

NATIONAL PRIORITY PROGRAM

# WHO?

## Who are the Implementers of the NIPP?

NATIONAL PRIORITY PROGRAM

**THE LEAD MINISTRIES OF THE JOINT PROJECT TEAM  
(JPT) FOR THE NIPP ARE:**

**MIWRE**

**(The Ministry of Irrigation, Water Resources, and Environment)**

**MWP**

**(The Ministry of Water and Power)**

**NATIONAL PRIORITY PROGRAM**

**THE OTHER KEY MINISTRIES OF THE JOINT PROJECT  
TEAM (JPT) FOR THE NIPP ARE:**

**MAAH**

**(The Ministry of Agriculture and Animal Husbandry)**

**MRRD**

**(The Ministry of Rural Rehabilitation and Development)**

**MHUD**

**(The Ministry of Housing and Urban Development)**

**MMI**

**(The Ministry of Mining and Industry)**

**KEY PARTNERS OF THE JOINT PROJECT TEAM (JPT)  
FOR THE NIPP ARE:**

**USAID**

**JICA**

**GTZed**

**WB**

**CIDA**

**India**

**ADB**

**FAO**

**Iran**

**EU**

**KFW**

# WHY?

Why is the NIPP a priority program?

NATIONAL PRIORITY PROGRAM

# THE VISION

**To gain ample water supply for communities, irrigation water for various farmlands and sufficient power for the industries by harnessing the water and power generating potential of various river systems and other alternative energy sources.**

## THE GOAL

**“A fully functional independent State wherein by integrating resources development, Power and Irrigated Lands will be accessible to the citizens while contributing to regional food stability and sustaining economic growth”**

## **Provide Water**

**Sufficient water supply will mean that the effects of severe droughts are minimized or limited thus helping alleviate the burden on farmers to resort to auspicious crops.**

## Generate Power

**Afghanistan's hydropower generation potential is enough to provide sufficient energy to accommodate industrial infrastructures.**

## Sustain Growth

**Harnessing water and power will enable Afghanistan to have the capacity to build farmlands and industrial parks that could provide much needed jobs for its people.**

# WHAT?

What are the components and sub-programs of the NIPP?

## **Reconstruction and Rehabilitation**

**This subprogram aims to continue the work on uncompleted projects that was found to have great potential value to the people but have been held up by continuous strife through the years. It includes multi-purpose projects for irrigation as well as hydropower generation.**

# Reconstruction and Rehabilitation

REHABILITATION AND RECONSTRUCTION									
AFG Bud Ref	Project Title	Lead Ministry	1383			1384	1385	Beyond 1385	TOAL
			Exp Reqs	Funding Allocation	Gap	Exp Reqs	Exp Reqs	Exp Reqs	Exp Reqs

# NIPP

## Abiding by National Principles

NATIONAL PRIORITY PROGRAM

# SOCIAL EQUITY

## National Irrigation and Power Program

**When irrigated land is made available to farmers, they are able to maximize the return of the land. This helps farmers be more productive thereby enabling them to have access to increased income.**

**Power is likewise vital to national growth and it produces the necessary jobs for Afghans. More company means more jobs and more jobs means more buying power for the people.**

# CAPACITY BUILDING

## National Irrigation and Power Program

**Institutional Capacity** is built up in the ministries as they tie up with experienced contractors and designers while implementing these projects.

# CAPACITY BUILDING

## National Irrigation and Power Program

MIRABS and other water users are consulted and are encouraged to participate in the implementation and construction of minor Irrigation and Hydropower projects thereby allowing access to **Human Capital**. This exposure gives local authorities the chance to take part through consultations and feedbacks. Most of these will be given the chance to participate in implementation.

# GENDER ISSUES

## National Irrigation and Power Program

The Project Coordination Unit of the Ministries, which is primarily involved with the design and implementation of the projects under the National Priority Program are comprised of men and women personnel. With this, we hope to promote **Gender Awareness and Equality** in the government sector.

# VULNERABLE GROUPS

## National Irrigation and Power Program

Farmers of different ethnicity from remote villages of the nation are considered one of the most **vulnerable groups** in Afghanistan.

Proper distribution of Irrigation Water and Power resource hopes to address the most vital needs of this sector and aims to promote welfare in these areas.

# STABILITY & SECURITY

## National Irrigation and Power Program

Drought and lack of power are the primary source of the uncertainty of the people. If this problems are addressed, a level of certainty is assured and people become more **Stable and secure.**

# PROVINCIAL EQUITY

## National Irrigation and Power Program

In order to assure **Provincial Equity**, the scope of the projects under the NIPP is broad-based and addresses the primary concern of equal distribution of resources. With the implementation of these various projects, it is foreseen that all the regions are benefited and will have access to Irrigation Water and Electricity.
